EDITORIAL

We are a group of left-wing activists, who want to develop the anti-capitalist and not-state-loyal resistance and to contribute to the creation of common perspectives and structures for the resistance in Western Europe in general.

Among other things we work with the subjects:

Anti-imperialist solidarity with the intifadah of Palestine, fight against repression and solidarity with the political prisoners in Western Europe, development of a revolutionary strategy for autonomous resistance against the EEC-project of the multi-nationals, revolutionary feminism against genetic and reproductive engineering and population policy, restructuring and the new definition of class.

AUTONOMI NEWSLETTER is our group's magazine in English, which inform other revolutionary milieus about some of our activities. The perspective of AUTONOMI NEWSLETTER is to contribute to a qualitative better communication network between autonomous and anti-imperialist groups in Western Europe.

AUTUMN'90:

**THE SHOW TRIAL
AGAINST A GROUP OF
LEFTWING PEOPLE
IN DENMARK!**

The so called Robberycase
a paradoxical trial against a group of left wing activistist.

The police has with the help of the juridic apparatus and the
tabloid press established a "martial law" like practice against the 7
comrades from CWG/Café Liberation, which among other things aims to
develop a special law concerning the fighting down of revolutionary
activitis to come.

Monday the 3. of september, is the day when the paradoxical trial against
the 7 imprisoned comrades of communist workers group (CWG)/Café Libera-
tion. They are accused of quite a few robberies, burglaries and illegal
possession of arms. The haul of this activity, they should supposedly
have given to the Marxist orientated palestinian liberation organisation
PLFP. The further charged with the killing of a young policeofficer
in connection with the robbery of the Post office at Købmagergade in
Copenhagen.

The media - marionets of the police

There have been written many a scrupulous and slanderous sensation-
stories in the massmedia about this case. The worst slander have been
written in Denmarks daily lottery ticket "Ekstra bladet" and in the
former 2nd. world war resistance paper (dis)"Information". The massive
media campaign has set its mark on the populations as well as large
parts of the leftwings stance towards the imprisoned comrades.

This has among other things resulted in parts of the political leftwing has either kept quiet and leave the initiative to the state apparatus, or simply only having positions on the juridic aspect of the case, or - what is even worse participated in the "quive" consisting of the state, right wing and all kinds of systempreserving forces against the "TERRORISTS"!

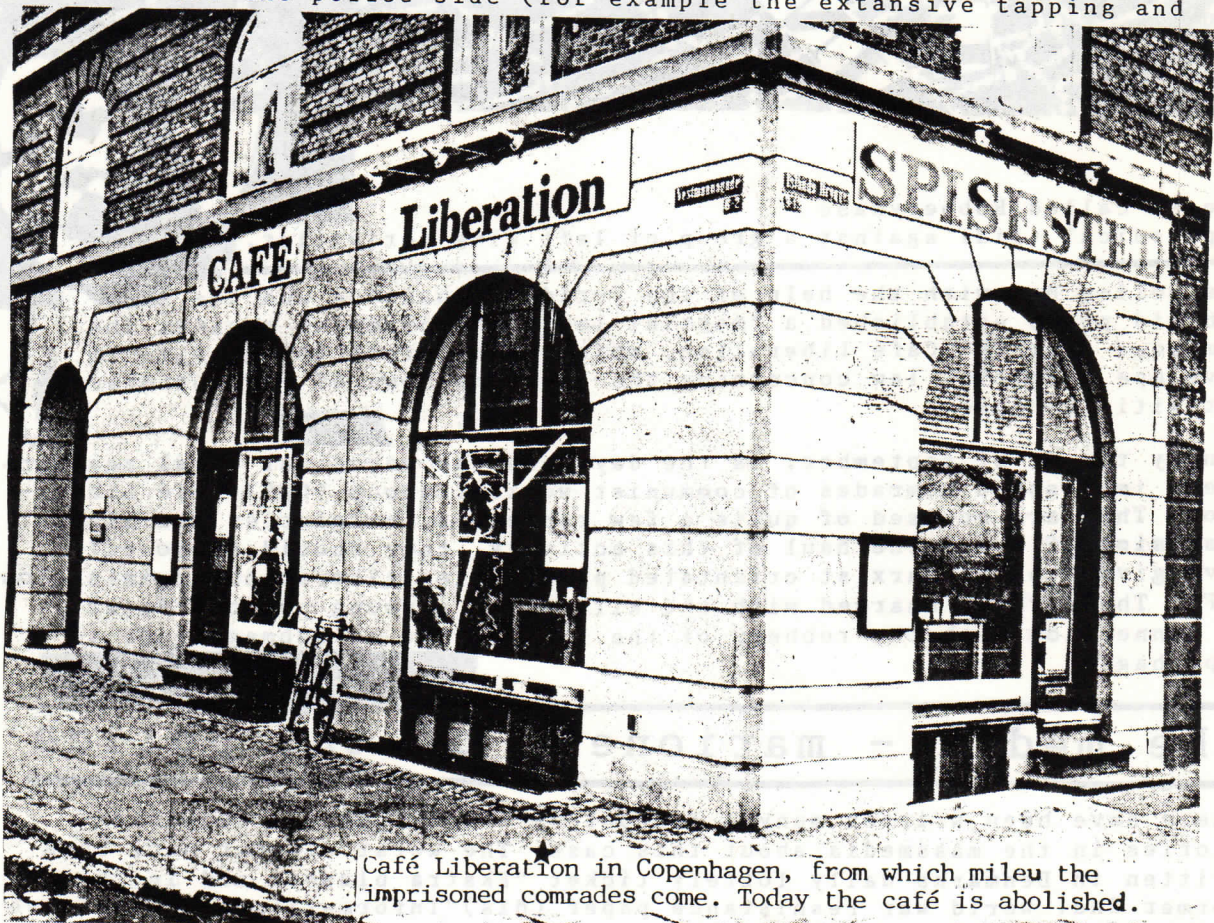

The police practised a state of martial law.

To us this case is a clear visualisation of the, until recently hidden, real power political possibilities, which the police and its marionets, the press can make use whenever the want to criminalise somebody or something.

The comrades of CWG/Café Liberation has been accused of many things, without their lawyers having the possibility of answering back in public. Partly because the court meetings took place behind closed doors, which automatically abligated the defence lawyers to keep their mouth shut, and partly because the defence lawyers untill very recently did not have acces to police accusation files.

The police used this to the max, by building a self fabricated construction of the charged comrades socalled "terrorist activity", with the help of planted rumours, lies and legends which they consciously leaked to a thankful press. The purpose with this is CRYSTAL CLEAR: To prejugde the charged in broad parts of the public and in that way open up for a general acceptance expansion of the action possibility of the police against the left-wing, beyond the formel exististing administration of justice act.

The course of events all the way back from 1980/81 until the arrest and the process it self, is characterized by murky deeds, mystic and illegal operations from the police side (for example the extansive tapping and

★
Café Liberation in Copenhagen, from which mileu the imprisoned comrades come. Today the café is abolished.

surveillance without a warrant, illegal searches etc.). As late as last week it came out from one of the police "informationmazes", that PIS (Police Intelligence Service) before and after the robbery at Købmagergade post office were listening in on and observing the milieu around the 7 imprisoned comrades. WHAT WAS THE REASON? Another mysterious event was the car accident in May '89 where the now imprisoned Carsten lost his eyesight. This accident came quite useful for the police, actually it was in the last moment for the settling court meeting about prolonged custody of the, at that time already arrested. At this time the whole case was smouldering for the police. But with the car crash this pigs got the final proof for the further proceeding of the case: In the wrecked car the cops found keys and address to the Blekingegade-apartment, which allegedly contained all the proof, which the police so eagerly had sought: weapons, notice books, fingerprints, plans etc. A quite murky affair in our opinion! We mean that this event and the behaviour of the police as a whole should be a theme, for a international investigation committee, made by different solidarity committees, lawyers and friends and family of the 7 imprisoned comrades!

The propaganda show of the state after a "rambo-cop" had been killed at a post robbery

A test for the process of adaption to EEC 92.

The polices total isolation of the 7 robbery charged comrades for 420 days, plus the actual disregard of "normal" constitutional rights (juridic covered by special paragraphs which PIS and jugdes in common proclaimed under cover of the "terrorist complex"), revealing these state institutions real possibilities to be quite large when it comes to the individual methods, which the different authorities of the police practises in this case, will get opportunity to establish it self as regular procedure, they will then at any time could be used against real or alleged resistance activities against the ruling society. With this there will exist two different juridic and police routines: one for so called normal criminality and one for so called "political motivated criminality". Just that way is how it works in most of the other EEC/NATO countries to day, if martial law and special paragraphs gives the police and the courts extensive political and juridical rights in the struggle against the left-wing opposition in the form of: state authorised slander campaigns - criminalisation - imprisonment without duty of proof under cover of the special paragraphs for terrorist-suspects, and last but not least destruction in the prisons through total isolation.

The EEC/NATO insurrection fighting strategy.

Control over revolutionary forces and movements is a central political assignment for EEC and NATO's Europe plans, which aim to expand their military-industrial strategy for all of Europe. EEC-project 92 aims towards a new order for Europe as a whole, which via production-restructuring and common superior political centralisations, are going to develop a new imperialistic power center. Expected revolts and revolutions against growing poverty as the advancing marginalisation of still larger groups of the population who will be without guaranteed working and living conditions, shall be met with international operating riot-fighting practice. In this way there has already in many years existed superior repression and institutions as for instance: TREVI-organ for international police cooperation, common insurrection fighting commandos with combat experience from practical riot fighting in Ireland, Basque country, Italy and west Germany, common law commissions and the European political cooperation board, which is the superior political crisis management for the west European military-industrial complex.

Solidarity with who?

Let us make it clear, that for us Autonomous Revolutionaries, the people charged with robbery from CWG/Cafe liberation are COMRADES! And in that way a part of the revolutionary left wing. If it is true, what the police claims: that they should have pulled some robberies through, for the advance of the Palestinian resistance against the Israeli occupation power, so we are glad that it succeeded!! It is totally legitimate to support the Palestinian struggle with among others money, which have been taken back from the imperialist institutions (banks consortiums, multinational concerns) modern predatory raids and oppression practice of the poor countries in the so called 3. world. It is namely these capitalist institutions, which with their debt setting and plunder policies are directly responsible for the unbelievable poverty, injustice and hunger in these countries. That the police and the bourgeois mass media are screaming up about the imprisoned alleged support to PFLP as a support to "terrorism" is also a hypocrite farce! PFLP is as you know, a Palestinian liberation organisation, which is fighting against the Israeli occupation of Palestinian cities, villages and land. The EEC/NATO-states has right from the state of Israel's beginning in 1948 supported Israel as their strategic/economic deputy in the middle east, and they have not done anything against the Zionist state superpower-plans and occupation policies in the Palestinian area! To support PFLP is therefore the same as supporting an oppressed people's struggle.

About the killing of a young police officer, we can only say that we have only heard the police version, and that we already now know that it was the pigs who shot first. They shot directly into the escape car and in that way they put human lives at stake. Completely aggressive and unnecessary! Cornered, as the escapees were, they tried to stop this murderous man hunt. Unfortunately, during the following firefight a young policeman was killed, his behaviour during the event had been "RAMBO"-like...

The police apparatus used this event for whipping up a witch hunt-mentality and put pressure on critical voices to keep them quiet. From the right wing to essential parts of the left wing supported the calmly calculated propaganda show of the state.

The off-solidarisation and the distance-laying with and to the imprisoned comrades reached, as the police escalated the case, its culmination only few voices kept protesting against the imprisoned comrades, prison conditions and demanded publication of all material and informations about the case and the closer circumstances, and the abolishment of the martial law situation (especially the prisoner group of "Autonomous Info" in the "DEMOS" bookshop practised a active and continuing solidarity with the imprisoned).

Solidarity how?

As you can see of the already mentioned, it is for us as autonomists elementary to demand "reasonable" conditions for the comrades as political prisoners. CONCRETE: the abolishment of the isolation, free the blind Carsten Nielsen.

Unification of the prisoners in one prison collective (if they want it!) uncensored letters and free visit rights. We have at different occasions suggested, that a continuing and working solidarity committee, which is open to ALL interested and engaged lawyers, public well known persons who have solidarity and left wing activists. IN that way we can unite against police- and press slander campaigns.

THE PROBLEM: to us is, that we actually don't know where the imprisoned comrades stand and what they themselves mean about the case.

In this way there, from the side of the prisoners, haven't been a common political answer to the media and the police apparatus slander campaign, or common demands in proportion to the existing prison conditions. we don't know if they actually see themselves as political prisoners, and we don't know how they actually stand in proportion to the existing struggles in the different EEC/NATO-countries prisons with exactly the same (or worse-) prison conditions and criminalisation mechanisms which they themselves has been are exposed to as political prisoners in Denmark.

(At this moment for example 45 Spanish revolutionaries are fighting with a 9 month long hungerstrike (with force feeding) for the demands of abolishment of their isolation and for reunification in prisoner collectives.) To us it is of important character to know if the imprisoned comrades of CWG/-Cafe Liberation political will fight to change their situation as political revolutionaries together with other fighting revolutionaries in EEC/NATO prisons. It is in our opinion all about knowing that a support to other political prisoners is more a solidarity acknowledgement with a struggle in another country. The one who takes the discussion about the soon to come EEC-union and the resistance against this serious, must admit that a active solidarity with political prisoners struggle against, the more and more, the same prison conditions for political prisoners in the EEC/NATO-countries at the same time is a struggle for change of our own conditions of struggle and regional strength proportions. In that connection we hope that the imprisoned comrades soon will make their own status and self understanding clear. Demands and perspectives.

We mean that real solidarity activities must be based on something that the struggling active prisoners give out themselves. Until this has happened, we can only do with principal demands, turned against criminalisation-isolation-and smear-campaigns from the side of the rulers.

-A group of Autonomists-
Autonomous Revolutionaries.

BACKGROUND STORY

(published in "Autonomi Newsletter" nr. 4/89)

• BANKROBBERIES,
• DANISH POLICE,
• MOSSAD,
• AND A LOT OF
• STAT-REPRESSION.
• A STORY FROM
• THE REAL LIFE!

DENMARK 1989:

13th of april, the police arrests seven persons in connection with "Café Liberation" and accuses them of gross bankrobberies and kidnapping of a bank-manager. According to the police, a part of the million loot from the robberies, which have been committed over the eighties, should have been donated to the Palestinian organisation PFLP. With that the police claims that there is a pretty good background for accusing the arrestants of violating section 114 in the Danish penal code, the so-called terror-section. The judge declines this at the preliminary examination as he puts five of the arrestant under custody. Two gets released, but the police maintains the charges

against them. One of them, a Danish citizen of Palestinian origin, disappears quickly out of the country. The police demands closed doors in the court - right from the beginning - in consideration of the research. But at the Police Intelligence Service headquarters the doors are pretty much ajar. The following days the press is flooded by anonymous police-sources, who informs that the suspects have been on a training course in the Middle east and that they are connected to the Danish Socialist Liberation Army, which the police suspected to be behind a serie of fires in Århus in the beginning of the eighties.

Some of the suspects are being alleged of carrying the same set of keys and there are ponder over that the keys should be used in a terrorists nest.

In the following days the solidarity organisations try to counteract the smear campaign carried out by the police, where PFLP is exposed to the public as a terror organisation. The police threatens

about using section 114 is lively debated in the press. The solidarity organisations declares that the police is trying to criminalize the support activities for the third world. But in the end of april the case is settling down, untill a car crash suddenly adds new perspectives.

AN APARTMENT BRISTLING WITH WEAPONS.

The second of may, Denmark gets a chock. The case have uptill now been a nearly banal crime novel, seasoned with political overtones by the polices gossip to sensationstarving newspapers. But then Carsten Nielsen has a crash in Birkerød. He is known by many in the solidarity environment both in Århus and Copenhagen. In the car the police finds a large amount of money, which they connect with the postrobbery in "Købmagergade" last year, one set of keys and the adress: "Blekingegade 2".

As the police examines the apartment they find the largest illegal weapon stock ever found in Denmark and even more compromising material against the five already in custody plus an additional four persons. These four gets arrested. One of them is a woman, who was among the two who got released after the first arrest. She is now being arrested again and put in custody. Carsten Nielsen is in the hospital with serious damages after the car-crash, among other things his eye sight is ruined. He is put in custody in absentia.

After that the press goes berserk. The environmental surroundings of the suspects is being trenched, and the organisation "Communist Working Group" (CVG) turns up as a "secretly suspect group" which is behind the robberies; killing a police-officer, kidnapping and connections to the Middle east.

Communist Working group (CVG) is a offshot of a maoist sixties group "Communist Worker Sphere". This organisation was dissolved in 1978 and CVG was formed.

The political characteristics of the group is the so-called "parasite state theory": it indicates that the workers in the imperialistic countries are bribed by the capital - through higher living standards, consumer goods. Therefore it is impossible to assume that the working class will fight

against the imperialistic rulers and their exploitation of the third world, because the western standards of living is based on this (sur-plus-profit) exploitation of the dependent countries in the third world. The most important element in the anti-imperialistic struggle therefore has to be a direct materialistic support to the liberation movements in the third world.

CWS/CWG was in this way supporting the guerilla of the Zanu party in Zimbabwe, PFLP in Oman and SWAPO in Namibia plus the Palestinian struggle. Mostly with money.

As CWS and later CWG from the standpoint "the corruptness of the working class through participation in the surplus-profits" believe that the liberated areas in the third world will encircle the imperialistic centres, the groups were not active in Denmark (their few political activities in relation to Western events sometimes seemed grotesque: in this they supported the enrollment of Denmark in the EEC in the beginning of the seventies).

Despite the fact that CWS and later CWG during the whole period of time issued a number of books, magazines and booklets - also shortly before the jailing of their leading activists - the group remained without any contact with the leftwing.

The police has in the late spring released 2 comrades, and imprisoned 3 other during the summer. Today there is a total of 11 comrades in jail from the CWG-group, charged of robbery, police-murder, illegal possession of arms plus association with "terrorist foreign" organisations.

The first arrests indicates that the Israeli foreign intelligence service, MOSSAD is heavily involved in this affair.

Why was a charged Palestinian permitted to travel out of the country?

A highly placed PLO-source told the Danish television newscast, that the Palestinian is a former member of the PFLP, but now is thrown out and could be a MOS-SAD agent.

PET, MOSSAD AND THE "LIBERATION/CWG-AFFAIR"

PIS and DIS (police intelligence service and defence ditto) Oliver and Hardy

Two reactionary, fumblefingered specimens. Allways with their noses sticking out too far, and allways getting into trouble in their crave to present the astonished public to new complicated ramifications in the colossal conspiracy formed by the urban leftwing.

If this could be reduced to the grotesque "exposure activism" of the PIS-partners, we could easily be content with different special issues of the same kind.

Unfortunately the background for the actual conduct of PIS against parts of the leftwing today is of a more serious nature. It aims at an attack against - and criminalisation of - non-institutionalized activities. We have to struggle united to prevent the intentional disruptions inside the leftwing, and to prevent that the activists of the leftwing are isolated from those parts of the population, that untill now in different ways sympathise with/identify with the affected leftwing activities.

THE INCREASING POLITICAL INDEPENDENCE OF THE POLICEMACHINERY (including PIS)

The multiannual and latent infringement of the police and PIS against leftwing activities is according to us mainly because of two reasons:

1. To criminalize any political activity, which is not orientated to the parliament, in other words any tendency to revolutionary activities.
2. To extend the political rights of the police as a joint in a goal-directed development towards a common Western-European police-machinery with homogenous and coordinated procedure.

To the rulers it is a matter of developing a common revoltfighting-praxis against rebellions, revolutions and other disturbance of that law and order, that guarantee the smooth functioning profitsystem of the multinationals.

The increased repression against leftwing activities and labour activities shall be observed in this coherence.

The criminalisation campaign of the police, PIS, the justicemachinery and the media against the jailed/suspected comrades from Café Liberation/CWG, who by the way was convicted long ago without petty-minded concern about the administration of justice, is just one of the examples of the infringement against leftwing-activists there is going on at the moment. They have among others been turned against: striking dockworkers, anti-apartheid activists, squatters, Christians, the Westgermany comitee and different autonomous connexions, Palestinian activists, their freinds and the PLO office in Denmark.

Independent of circulating political disagreements about each others political strategics and praxis, a active common solidarity against the infringements of the state is a necessary condition for all other kinds of common activities.

The necessary mobilisation of solidarity against the infringements of the state shall not be reduced to cosmetic corrections just to contribute to a stabilisation of the imperialist "democracy" the way that reformist parties do. The purpose must be

to strengthen the consciousness about the built-in repression-machinery of the profitsystem. Only that way do we reverse the battle against repression (a defensive battle) to a mobilizing and progressive activity.

PIS AND THE "LIBERATIONAFFAIR"

There are incredibly many unscrupulous and consciously distorted sensational stories written which have stamped the attitude of the population as well as the leftwing concerning the case about the jailed comrades from Café Liberation/CWG. This has among other things lead to a "familisation" among some parts of the leftwing in their common eagerness to ban terrorism, whatever this diffuse and hackneyed concept means.

To us this case is primarily a sober illustration of the actual possibilities which the police and press of the system disposes of to criminalize anybody, anywhere and anytime.

The comrades from Café L./CWG have been accused of many things without having any actual possibility to answer back. Their attorneys are more or less sentenced to silence, and are action-paralysed.

The comrades have now been isolated during almost 6 months and have been exposed to permanent pressure and malice. Carsten Nielsen, who has gone blind after the carcrash, is denied the almost elementary needs of physical and psucological survival as: daily visite, continous hospital stay, the right to refuse examination and untill August he was refused the right to recieve tapes.

The aquirement of the so-called evidence in the case has taken

place in a highly peculiar way and is showing striking resemblance to mafia and gangster methods. We think that this should be the theme for an investigation committee established by different solidarity committees.

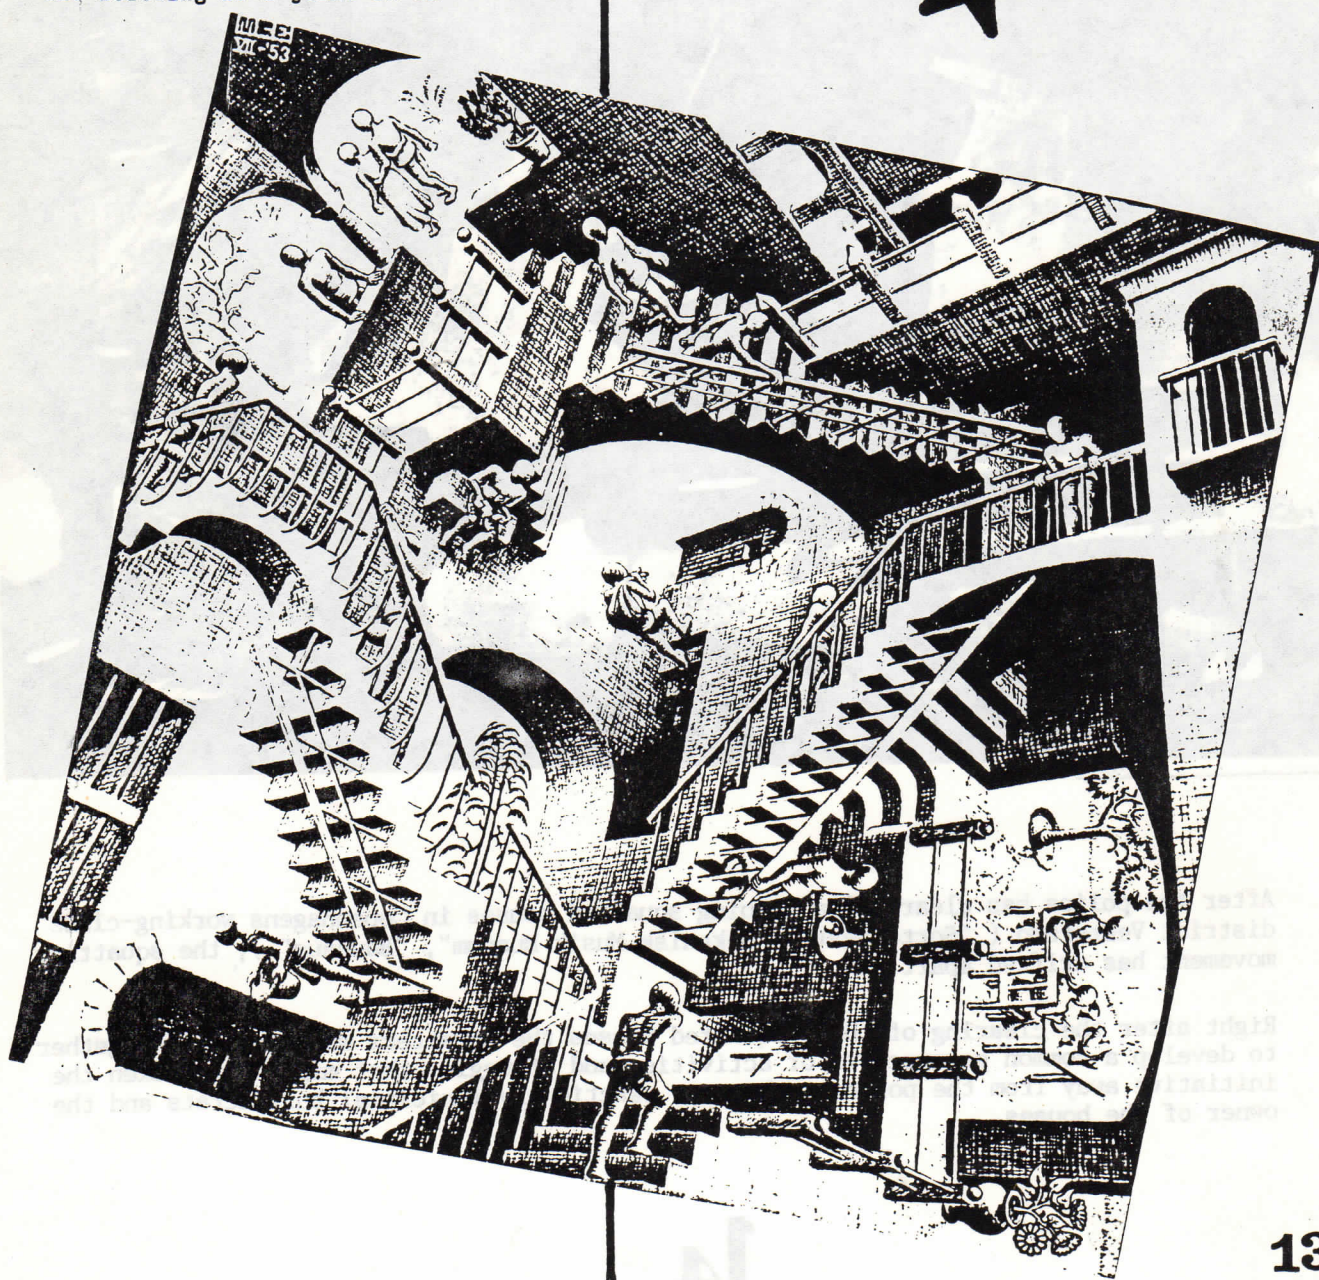

A political, strategical valuation of the activities of the CWG/Café L. is for the time not relevant to us, as we do not know what is actual and what is not. Should it however be true, that a bank or two has been lifted for some money, which have gone to the anti-imperialistic liberation struggle, we won't be rather sad about it!

The higher goal for PIS and MOSSAD is to develop a massive smear-campaign against the rightfull struggle of the Palestinians for their identity and for an independent and free Palestine. The discredit of the PLO-office in Copenhagen, the Palestinians and their friends on the leftwing is a joint in an

offensive by extreme rightwing forces in Denmark - triggered by the activities of PIS and MOSSAD - to straighten up the breaking image of Israel to the Scandinavian public. This is the other pillar of the present smear- and criminalisation campaigns.

WE DEMAND:

- RELEASE OF ALL SUSPECTS IN THE CASE AGAINST CWG/CAFE L.
- THE MAKING OF AN INVESTIGATION COMMITTEE CONCERNING THE ROLE OF PIS/MOSSAD IN THE CWG/CAFE L CASE!
- STOPPING OF THE SMEAR-CAMPAIGN AGAINST THE PLO-OFFICE IN COPENHAGEN.

EXIT OF THE SQUATTING MOVEMENT IN COPENHAGEN?

After the police has cleared 3 adjoining squatted houses in Copenhagens working-class district Vesterbro ("Sorte Hest", "Mekanisk Musik Museum", "Bauhaus"), the squatting movement has drifted apart.

Right after the clearing of the 3 squatted houses the squatters were not able together to develop a common perspective of activities and struggle, that might have taken the initiative away from the police-machinery, reactionary municipal bureaucrats and the owner of the houses.

After a period of bigger and minor resistance activities and protest actions, different reformist forces managed to turn the sporadic and not coherent activities of the squatters into a reform project: The plan was to change the former squatted houses into a meeting- and activity centre for the local inhabitants of the district. It was a social reform-project, which should compensate for the general social and economical cuts, that at the same time rains down on the people in the district. A project, that objectively seen should conceal the real policy of reduction, which had been lead by the socialdemocratic city-management, and even should be realized at the expense of the squatters former resistance project.

Instead of developing discussions for an autonomous basis-resistance, parts of the squatting movement took part in a peace- and commonact agreement with the districts socially and economically indigent socialworker-institutions and municipal reform-projects. The aim of this was to get a municipal majority in the town hall for establishing the former mentioned activity centre. A lot of "help" was also given from the institutionalized leftwing parties and from progressive personalities. It was clear that they canalized the "unpredictable resistance" of the squatters into institutionalized lines.

The police and not organized craftsmen destroyed the well restored houses completely

When this project was refused by a political majority in Copenhagen the formalized co-operation between the squatters and representatives of the municipal social reform projects in the district stopped. At this time the houses as resistance places were lost under all circumstances, and the squatting movement had drifted apart in different directions. (Some had bought a villa together, "Ungdomshuset" functions mostly as an ordinary music place, the former squatted house in Baldersgade is buying itself from the owner, etc.)

The 2.2.90 the police cleared 3 squatted houses. The squatters were taken by surprise and didn't offer immediate resistance

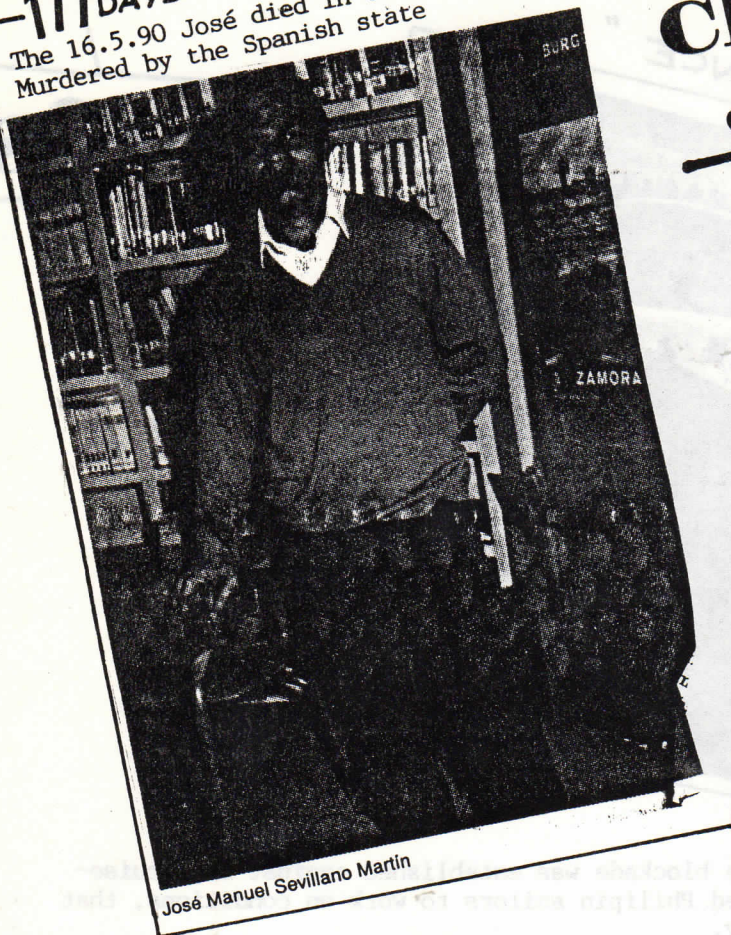

Today only exists one (1) squatted house in Copenhagen: the house in Viborggade. It has been squatted for 5 years, and in the spring 90 quite new people moved in. Now this house is threatened by clearing, after the "Arbejdernes Andelsboligselskab" (a socialdemocratic completely capitalized firm) has received building license for the site of the squatted house.

Activities have started to prevent a clearing. If they will succeed in this depends on whether the squatters are able to create a wide support in the district and among the different activist mileus. Beyond diverse benevolent clasps from leftwing people, who try to canalize the project into "normal lines"

A demo is planned for the 7.9. - this might be the start of such a solidarity campaign.

WALK ON THE WILD SIDE !

177 DAYS IN HUNGERSTRIKE!
The 16.5.90 José died in the 6.th. month of the hungerstrike.
Murdered by the Spanish state

CIAO JOSÉ!

IN COPENHAGEN:

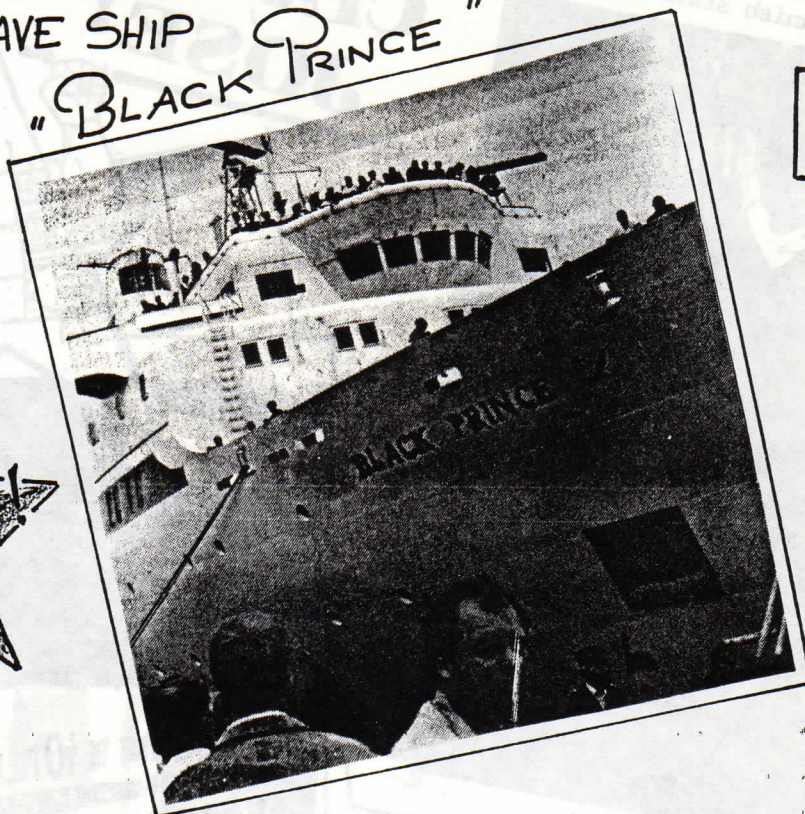

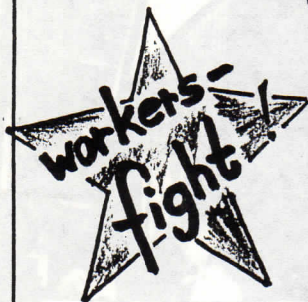

SOLIDARITY WITH THE HUNGERSTRIKING PRISONERS FROM GRAPO/PCE(R) IN SPAIN!

In Denmark different activities have taken place to mark solidarity with the hungerstriking prisoners from Grapo/Pce(r) in Spain. Some of them were :

- The biggest leftwing daily newspaper "Land og Folk" (owned by the Danish Communist Party) published in June a larger article written by autonomous activists concerning the hungerstrike in Spain (background, actual situation of the prisoners, development of repression in Western Europe and project EEC 92, perspectives of solidarity activities, etc.).
- In June was held a big, international conference in Copenhagen concerning "human rights" (CSCE-conference). This was a big propaganda show of Western politicians discussing human rights in Eastern Europe and the USSR. But autonomous activists from Infoshop ZAPATA used the opportunity to focus on the hungerstrike in Spain by making a demonstration in front of the Spanish embassy in Copenhagen (see photo), and by distributing pamphlets about the hungerstrike to the audience on the conference (which, by the way, resulted in brutal arrest of the activists!).

BLOKADE AGAINST THE SLAVE SHIP "BLACK PRINCE"

INFOS

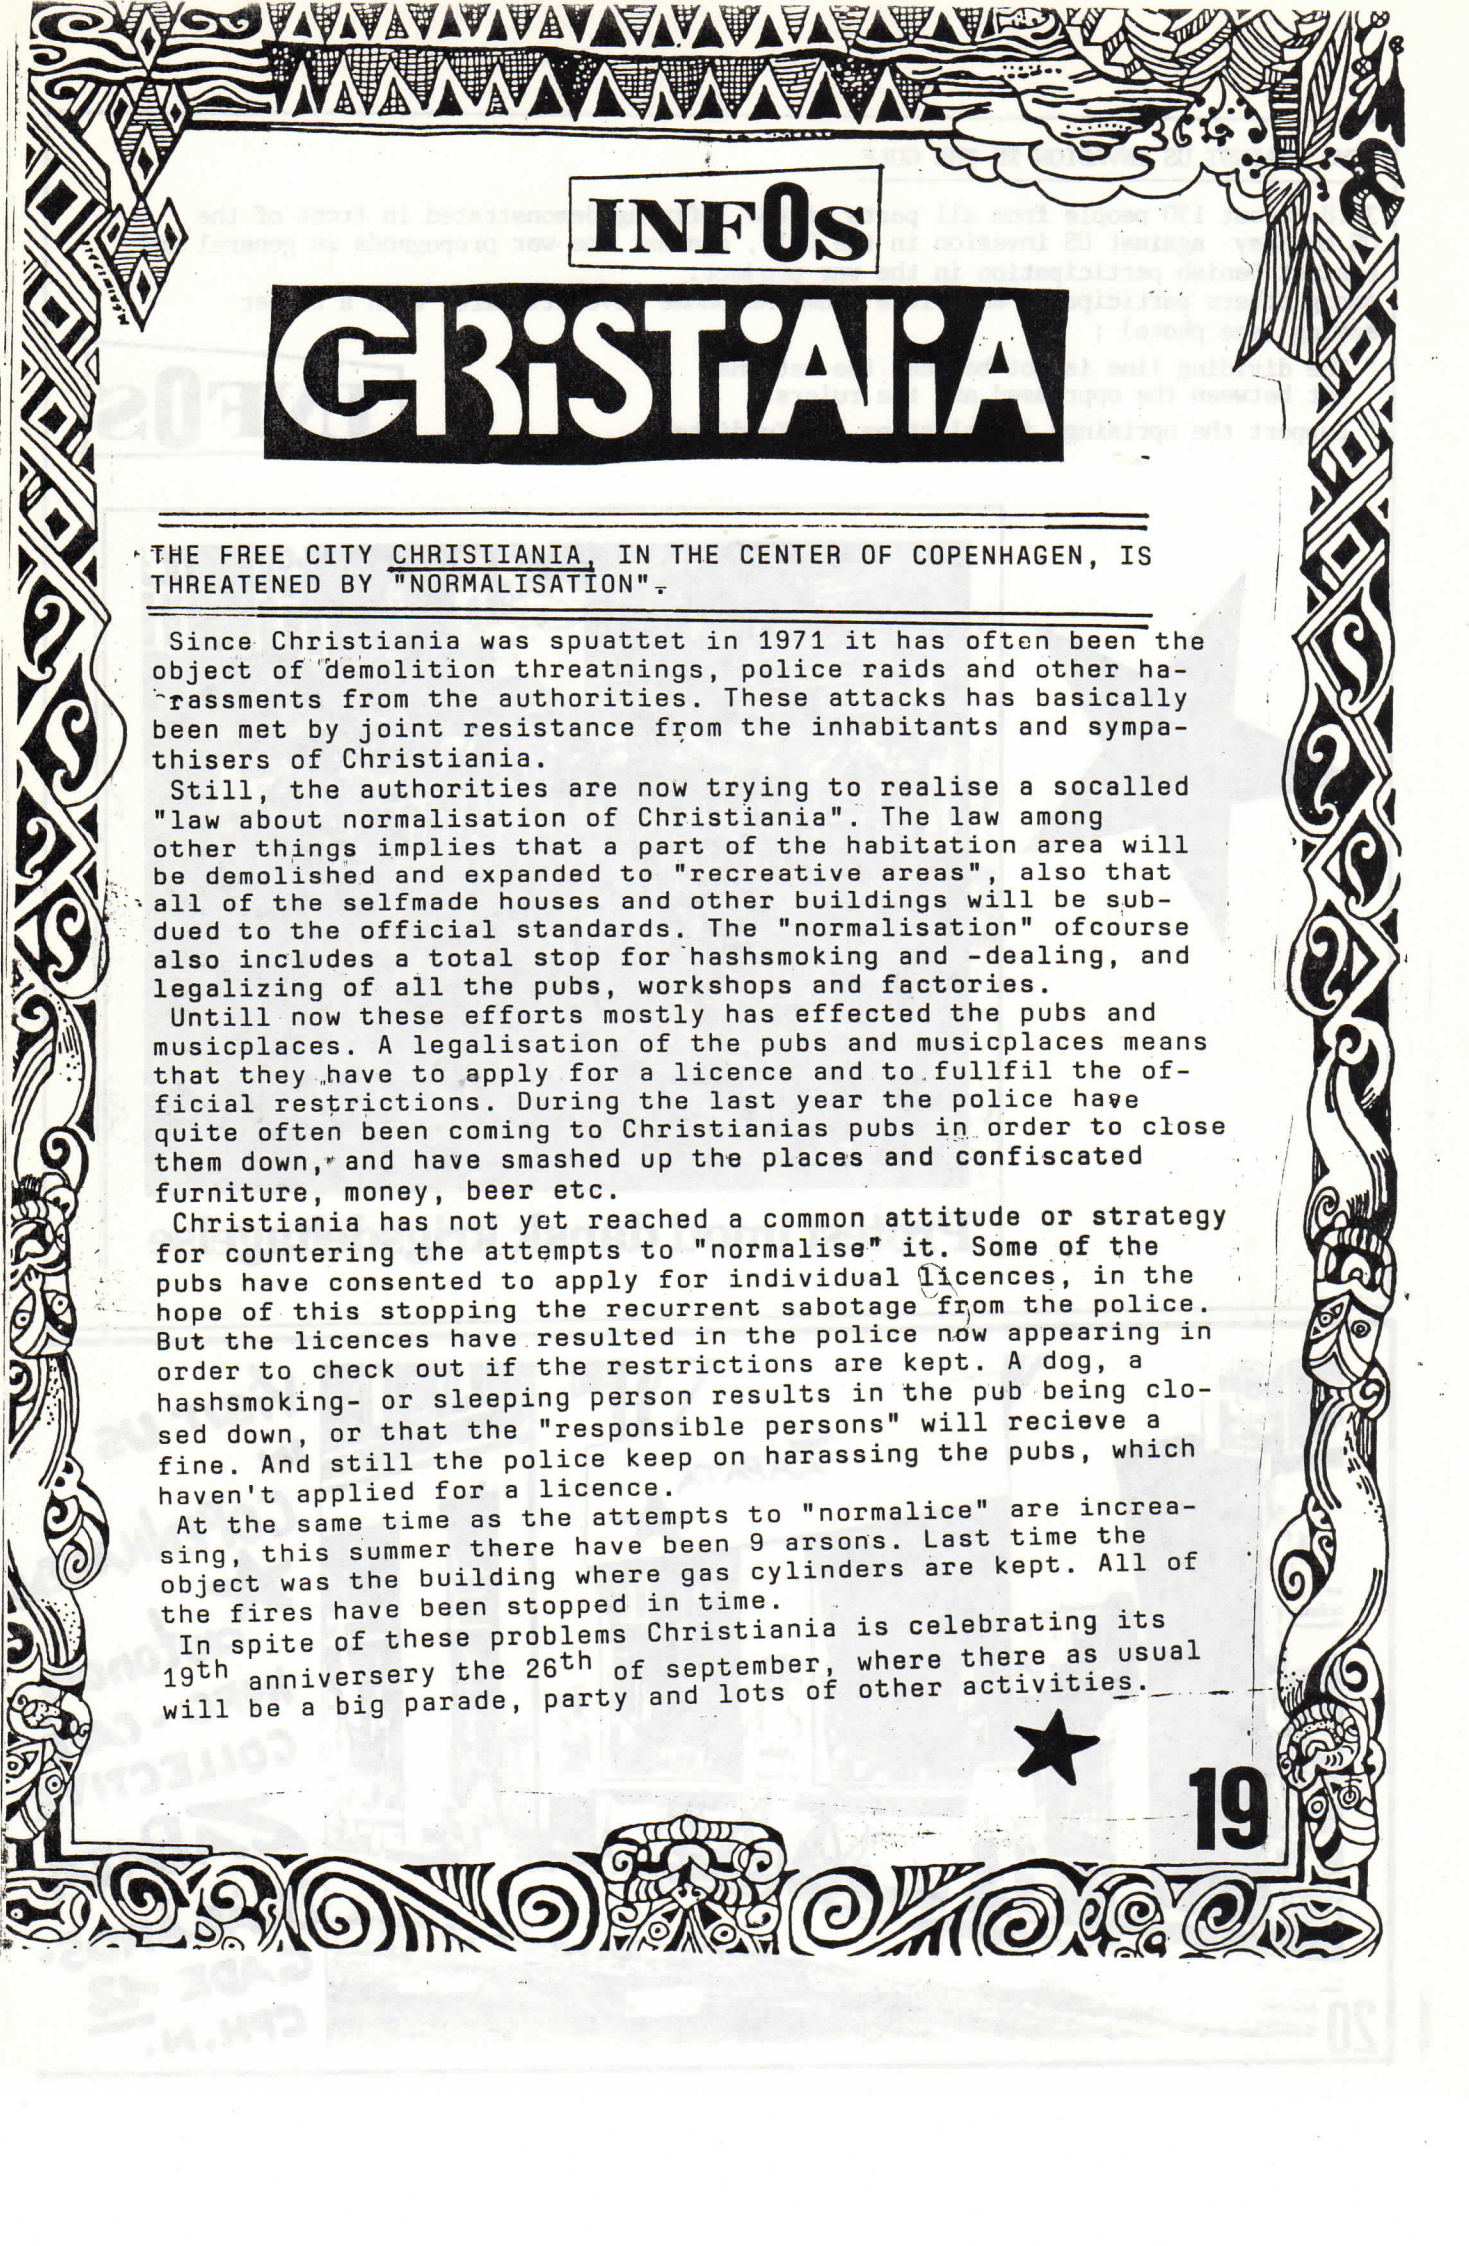

During several weeks in June/July a large blockade was established against the cruise-liner "Black Prince", because it had hired Philipin sailors to work on conditions, that can only be characterized as pure slavery.

The blockade took place at the harbour where the ship tried to enter. It involved activists from different unions, leftwing parties and autonomous or squatting mileus. The slave ship was protected by the police, which often arrested and/or beat up blockade activists.

The result of this was at first that "FRED OLSEN lines" temporarily stopped "Black Prince" from sailing, allegedly because of "violence on the dock"! But they later stopped it for good and "Black Prince" is now sailing between Norway and England!

INFOS

CHRISTIANIA

THE FREE CITY CHRISTIANIA, IN THE CENTER OF COPENHAGEN, IS THREATENED BY "NORMALISATION".

Since Christiania was spuattet in 1971 it has often been the object of demolition threatnings, police raids and other harassments from the authorities. These attacks has basically been met by joint resistance from the inhabitants and sympathisers of Christiania.

Still, the authorities are now trying to realise a socalled "law about normalisation of Christiania". The law among other things implies that a part of the habitation area will be demolished and expanded to "recreative areas", also that all of the selfmade houses and other buildings will be subduced to the official standards. The "normalisation" ofcourse also includes a total stop for hashsmoking and -dealing, and legalizing of all the pubs, workshops and factories.

Untill now these efforts mostly has effected the pubs and musicplaces. A legalisation of the pubs and musicplaces means that they have to apply for a licence and to fullfil the official restrictions. During the last year the police have quite often been coming to Christianias pubs in order to close them down, and have smashed up the places and confiscated furniture, money, beer etc.

Christiania has not yet reached a common attitude or strategy for countering the attempts to "normalise" it. Some of the pubs have consented to apply for individual licences, in the hope of this stopping the recurrent sabotage from the police. But the licences have resulted in the police now appearing in order to check out if the restrictions are kept. A dog, a hashsmoking- or sleeping person results in the pub being closed down, or that the "responsible persons" will recieve a fine. And still the police keep on harassing the pubs, which haven't applied for a licence.

At the same time as the attempts to "normalice" are increasing, this summer there have been 9 arsons. Last time the object was the building where gas cylinders are kept. All of the fires have been stopped in time.

In spite of these problems Christiania is celebrating its 19th anniversery the 26th of september, where there as usual will be a big parade, party and lots of other activities.

19

DEMO AGAINST US INVASION IN THE GULF

31.8. about 150 people from all parts of the leftwing demonstrated in front of the US embassy against US invasion in the Gulf, against the war propaganda in general and against Danish participation in the war project.

Among others participated activists from "Autonome Revolutionære" with a banner saying (see photo) :

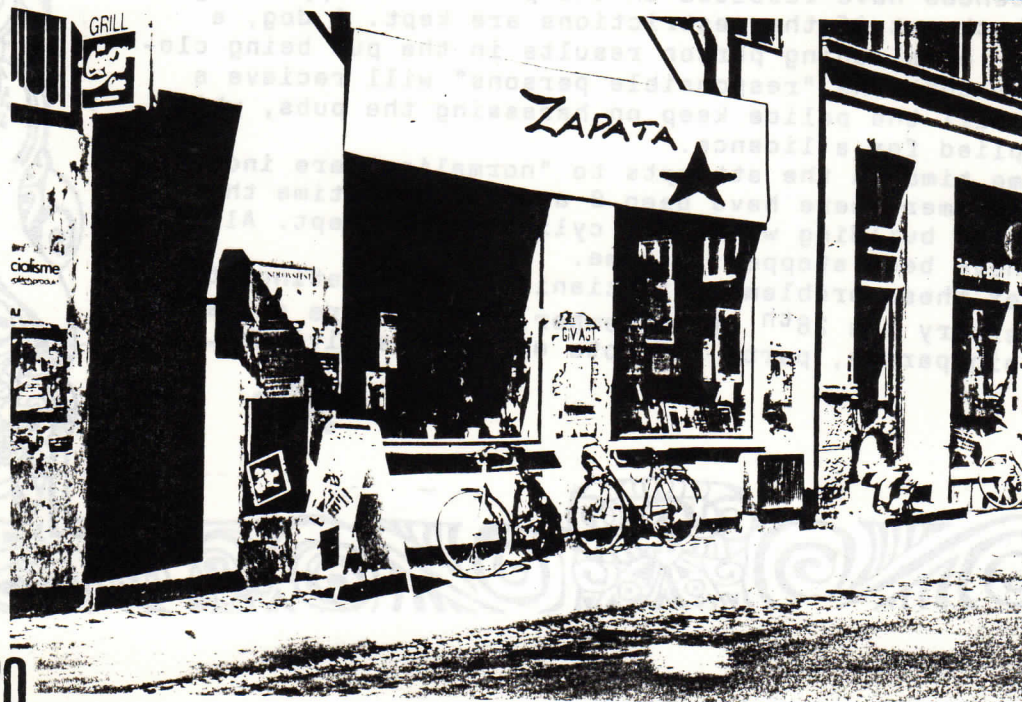

" The dividing line is not between the nations
but between the oppressed and the rulers."

" Support the uprisings in Palestine and Kurdistan".

THE LEFTWING / ACTIVIST PLACES AND PAPERS IN DENMARK :

Also in Denmark the leftwing is in a deep identity crisis. The reasons for this are many and complex. (This we have already dealt with in our "Autonomi Newsletter" nr. 4/89 in the common interview with different autonomous groups in Western Europe). The result of the crisis is a disastrous absence of any kind of organized and political alternative and multitudinous resistance against the EEC/Nato imperialist's general offensive against larger parts of the population in Western Europe.

In Denmark the leftwing is on the whole reduced to the party machines with their own party and organisation life WITHOUT remarkable out-turned activities. Right now it seems that a majority of the shrunk leftwing parties concentrate on establishing a common "red-green" list, which aims at (re-)obtaining representation in the bourgeois parliament! For what? We really can't see it would be of any use! If the list should succeed in getting more than 2% (which is the vote limit for obtaining representation), the result would be an even more legalizing, radical-democratic reform specimen, without basis activities and without any strenght.

As autonomous we think that the only possibility to shake the locked strenght relations is to develop a multitudinous and collective resistance with a clear international aim. A Western European resistance with basis in the terrain where we live and fight. Beyond juridical, geographic and patriarchal limitations! No pasaran!

- THE TRADITIONALISTS :

SF (Socialistisk Folkeparti/ Socialist peoples party):

Has about 7.000 members, most of them passive voters unions.
Today it functions as leftwing of the Socialdemocracy in parliament. SF has 11% of the votes, the Socialdemocracy has 31%. These 2 parties is a diffuse and antagonist parliament opposition the rightwing government coalition. Both of these 2 bourgeois workers parties take part in the policy of reduction initiated by the government. Want to reform EEC with a "social dimension" (sic!).
Address : SF, Frederiksborgvej 5, 1., 2400 Kbh. NV.

DKP (Danmarks kommunistiske parti/ Danish communist party):

Has about 4.000 members. Their newspaper "Land og Folk" has a daily circulation of 5500 numbers. During the last year the party changed from a stalinist parliament orientated reform party to a non-stalinist one. Together with VS and SAP, DKP has created a "red-green", not dogmatic list for parliament elections. Their daily newspaper "Land og Folk" has become a open newspaper for the leftwing as a whole.
Address: DKP, Bredgade 25E, 1070 Kbh. K.

VS (Venstresocialisterne/ The left socialists):

The party has its roots in the anti-imperialist studentrevolt. Today VS is in a difficult crisis of orientation. Its activities are mostly reduced to the party machine. Is the driving force in the "red-green" common list, where also DKP, SAP and not organized take part. They have a paper called "Solidaritet", which is published every 2.nd. week in 4.000 numbers.

VSU is VS's youth organisation, it is small, rather active but without any political profile.

Addresses: VS, Rosenørns alle 44, 1970 Frederiksberg C.
Solidaritet, Rosenørns alle 44, 1970 Frederiksberg C.
VSU, Nørrebrogade 14, 2200 Kbh. N.

SAP (Socialistisk Arbejderparti/ Socialist workers party):

4.th. international trotskists. A small, but (traditionally) active party. During the last year its main activities are concentrated on the "red-green" list for parliament election. Among the untill now mentioned parties, SAP is the one with the most interesting political positions, but SAP has not been able to follow up these with an independent praxis. Their weekly paper "Klassekampen" is published in less than 1000 ex. During the winter Klassekampen will be united with VS's paper Solidaritet.

Address: SAP, Nørre Alle 11A, 2200 Kbh. N.

IS (Internationale socialister/ International socialists):

Small, dogmatic marxist party (division from VS in 1985/86), which has an ultra legalistic "massline", that aims at securing the leading role of the party in the future revolution ... Their monthly paper is "Socialistisk Arbejderavis".

IS is internationally connected with the British anti-stalinist party organisation Socialist Workersparty and the German group SAG.

Address: IS, Ryesgade 8, 8000 Århus C.

DKP-ml (DKP-marxister-leninister/ DKP-marxists-leninists):

A stalinist party. Albania orientated. Without any specific main activities. The only remarkable plus : they have some of the most popular folk musicians connected to the party ... Publishes a daily newspaper called "Arbejderen".

Address: DKP-ml, Griffentfeldtsgade 26, 2200 Kbh. N.

WHO IS WHO...

Besides there exist numerous solidarity comitees and groups, but most of them only exist on paper and in fact not active...
But of course there are interesting exceptions of groups and mileus with different activity levels :

PAPERS :

- ★ DIREKTE AKTION (anarco-syndicalist), Postbox 303, 1502 Kbh. V.
- ★ Ekomedia (alternative informationpaper), c/o Fredscenteret, Guldsmegade 25, 8000 Århus C.
- ★ Ravage (new squatters' paper) c/o Ungdomshuset, Jagtvej 69, 2200 Kbh. N.
- ★ Ugespejlet (paper of the free city Christiania) Christiania, Kbh.
- ★ Autonomi (published by a group of organized autonomous - Autonome Revolutionære), c/o Zapata, Blågårdsgade 12 st th, 2200 Kbh. N.

GROUPS AND MILEUS IN COPENHAGEN :

- * The squatted house and its cafe Kapaw in Viborggade Viborggade 41, 2100 Kbh. Ø
- * An autonomous music and meetingplace Classensgade 11, 2100 Kbh. Ø.
- * Autonomous info-cafe ZAPATA (run by different autonomous groups. A cosy information and meeting place, Blågårdsgade 12 st.th., 2200 Kbh. N.
- * DEMOS-butikken (run by different activist groups, bla. Fællesinitiativet mod racisme, anti-repressionsgruppen, autonomt info, etc...) Elmegade 27, 2200 Kbh. N.
- * UMA (Youth against apartheid) - Cafe and meeting place Blågårdsgade 2 2200 Kbh. N.
- * SCAN-LINK nej tak-gruppen (group which works against the Scan-link project) c/o Gimle, Thorshavns-gade 21, 2300 Kbh. S.

RADIOS :

- ▶ Christiania Radio, Det blå Hus, Bådsmadsstræde 43, 1407 Kbh. K.
- ▶ Nørrebro Radio (Byens Lyd), Stengade 30, 2200 Kbh. N.
- ▶ Sokkelund Radio, Rådhusstræde 13, 1466 Kbh. K.
- ▶ Radio Rosa, Knabrostræde 3, 1210 Kbh. K.
- ▶ Vesterbro Radio, Halmtorvet 13, 1700 Kbh. V.

★★★★★★★★★★

- From these activist groups and mileus there have during the last years been developed a lot of activities (smaller and bigger), which have one thing in common: to develop the basis resistance against the ruling relations of power.

RESOLUTION OF RAF

CONCERNING THE ATTACK ON

STATE SECRETARY - NEUSEL

"menschen, die sich weigern, den kampf zu beenden - sie gewinnen entweder oder sie sterben, anstatt zu verlieren und zu sterben" (aus dem letzten brief von holger meins)

josé manuel sevillano ist tot. er wurde im mai nach 177 tagen hungerstreik von der spanischen regierung ermordet.

die gefangenen genossinnen und genossen aus GRAPO und PCE(r) kämpfen seit 8 monaten mit einem harten und langen streik für ihre wiederzusammenlegung. sie müssen mit ihrer forderung durchkommen, und sie brauchen dafür die solidarität und die initiative von allen, denen es ernst ist. mit radikaler veränderung und dem kampf für eine menschliche gesellschaft.

der spanische staat setzt bisher gegen die gefangenen die harte haltung und folter durch. bei ihm liegt die verantwortung und entscheidung, aber die richtlinien dafür werden in westeuropäischen- und nato-gremien festgelegt, und deshalb ist die brd als führende europäische macht genauso für den tod von josé manuel sevillano verantwortlich. am 27.7.90 haben wir mit dem "kommando josé manuel sevillano" den aufstandsbekämpfungs-experten hans neusel, staatssekretär im bonner innenministerium, angegriffen. wir haben das militärische ziel der aktion verfehlt - die explosion sollte seinen sicheren tod aber auch den hundertprozentigen schutz unbeteiligter gewährleisten. in dieser spanne haben wir die sprengstoffmenge zu niedrig berechnet. wir wollten neusel für seine verbrechen zur verantwortung ziehen. er organisiert und führt den krieg gegen alle, die für befreiung, selbstbestimmung und ein menschenwürdiges leben und gegen die zerstörung, die von diesem system ausgeht, kämpfen. neusel ist seit 85 treibende kraft bei vielen trevi-treffen, von ihm gingen zahlreiche initiativen zur intensivierung und vereinheitlichung der westeuropäischen aufstandsbekämpfung und menschenverachtenden flüchtlingspolitik aus. daß sich seit 87 "terrorismus-experten" der weltwirtschaftsgipfel-staaten regelmäßig treffen, geht auf die initiative neusels und des französischen innenministeriums zurück.

in allen krisenstäben, die mit widerstandsbekämpfung zu tun haben (ob wegen der entführung von managern deutscher multis im libanon, koordinierung der fahndung nach aktionen von uns ...) und den geheimdienstausschüssen der regierung ist neusel entweder mitglied, oft auch vorsitzender.

im frühjahr 89, als die gefangenen hier im hungerstreik waren, um ihre zusammenlegung zu erkämpfen, war neusel (vor der ernennung von schäuble zum innenminister) faktisch chef des ministeriums - zimmermann hatte sich schon lange vorher inoffiziell aus dieser funktion verabschiedet.

in dieser zeit puschte das innenministerium offensiv die parole: "der staat darf sich nicht von diesen gefangenen erpressen lassen."

bei treffen von vertretern länder-justizministerien war neusel dabei, um dort die linie des innenministeriums zu vertreten.

im zusammenhang mit dem hungerstreik hier, war von anfang an klar: solange die harte haltung der regierung nicht durch den kampf der gefangenen und all derer, die die durchsetzung der forderung nach zusammenlegung zu ihrer eigenen sache gemacht hatten, gebrochen ist, solange ist neusel teil der fraktion, die über leichen unserer genossinnen und genossen gehen will.

die eisenharte nato-linie vertritt neusel für die bundesregierung aktuell in dem angriff der westeuropäischen bestie gegen die gefangenen revolutionäre in spanien. neusel verkörpert - wenn auch indirekt - die personelle kontinuierität des deutschen faschismus vom 3.reich zum "großdeutschland", das auf das 4.reich zusteuert. er hat seine politische karriere über viele jahre an der seite von alt-nazi und ex-bundespräsident carstens gemacht und formuliert auch öffentlich seine faschistischen gedanken und ideen ohne jeden versuch einer schein-demokratischen ummäntelung.

als es 87 um die aufnahme von 14 chilenischen gefangenen revolutionären ging, die von dem faschistischen militärregime zum tode verurteilt worden waren, verlangte neusel zuvor von ihnen die "entkräftung der

gegen sie erhobenen vorwürfe" - was nichts anderes hieß, als daß er ihre hinrichtung forderte. neusel hat die entscheidung über den einsatz der gsg9 und ist beteiligt an der entscheidung darüber, wer von dieser killertruppe ausgebildet wird, wie z.b. türkische spezialeinheiten, die heute in kurdistan das volk niedermetzeln.

die offensive gegen die gefangenen in spanien, mit der sich die sozialistische regierung unter gonzales endgültig - gerade in hinflick auf "europa 92" - als zuverlässiges mitglied der kernstaaten des europäischen machtblocks profilieren will, läuft mit voller rückendeckung der übrigen westeuropäischen staaten. dieser block mit der brd an der spitze hat sich heute zur weltmacht aufgeschwungen und muß gegen die sich ständig verschärfenden widersprüche, die sich schon lange nicht mehr befrieden lassen, die innere stabilität durchsetzen.

vor diesem hintergrund läuft aktuell quer durch alle westeuropäischen länder der versuch, jeden gedanken an widerstand und selbstbestimmung im eisernen würgegriff und der permanenten demonstration der totalität ihrer macht, zu ersticken. und in diesem zusammenhang hat die frage, ob die gefangenen in spanien mit ihrem kampf durchkommen, für die gesamte nächste phase, dem neuaufbau revolutionärer praxis in westeuropa, große bedeutung.

so wie der brd-staat 77 versucht hat, über unsere niederlage ein für allemal mit dem problem der guerilla schluß zu machen und gleichzeitig die gesamte linke hier in tiefe resignation und ohnmacht zu stürzen, so zielt der angriff auf die gefangenen aus GRAPO und PCE(r) zugleich auf die gesamte revolutionäre bewegung und alle fortschrittlichen kräfte in westeuropa.

die zerschlagung der gefangenenkollektive und die isolierung der genossinnen und genossen soll einen umschlag in der entwicklung der letzten jahre einleiten und das genau an der frage, wo die einheit

PUBLISHED IN THE ORIGINAL LANGUAGE

und das bewußtsein über die notwendigkeit gemeinsamen handelns quer durch westeuropa in den revolutionären bewegungen und bei vielen, denen es um radikale veränderungen geht, am weitesten entwickelt ist.

der versuch, diesen umschlag durchzusetzen, kommt aus der internationalen entwicklung: der imperialismus hat den kalten krieg gewonnen. die auflösung des sozialistischen blocks und damit auch seiner historischen funktion für die befreiungsprozesse im trikont hat zu einer neuen stabilisierung des imperialistischen machtblocks geführt. die rasende entwicklung der letzten monate und die einverleibung der ddr hat die brd innerhalb westeuropas zu uneingeschränkter vormacht und den ganzen westeuropäischen block zur weltmacht gebracht. aus dieser neuen machtposition versuchen sie heute an jedem punkt terrain gegen alle revolutionären kämpfe und kämpfe um lebensbedingungen zurückzugewinnen und da, wo von unten schon ziele durchgesetzt wurden, die entwicklung wieder zurückzudrehen.

seit anfang/mitte der 80er jahre, als der befreiungsprozeß weltweit an grenzen gestoßen war, mußten die kämpfenden überall anfangen, nach neuen wegen zu suchen. das hieß in vielen ländern im trikont, daß zu den revolutionären befreiungsbewegungen basisbewegungen entstanden sind, die für die veränderung der unmenschlichen und unwürdigen lebensbedingungen kämpfen und angefangen haben, ihren alltag selbst zu organisieren. so hat sich in verschiedenen ländern (die intifada in palästina und kurdistan oder die befreiungsbewegungen in el salvador oder den philippinen) eine macht von unten herausgebildet, die neben der reaktionären staatsmacht existiert.

diese entwicklung hat ihren ausdruck auch in den metropolen. die kämpfe, die sich in den letzten jahren hier entwickelt haben und in denen unterschiedliche menschen zusammengekommen sind, sind kämpfe für veränderung hier sofort. zum einen richten sie sich gegen zerstörerische imperialistische projekte. zum anderen sind aus der erfahrung vieler, daß der kapitalistische alltag mit konkurrenz, der beziehungslosigkeit der

menschen untereinander, dem leben in der isolation zerstörerisch ist, kämpfe für selbstbestimmte lebenszusammenhänge entstanden. das ist der kern davon, daß in ganz westeuropa zum beispiel hausbesetzer(innen)bewegungen entstanden. da wo sich menschen selbstbestimmte räume erkämpft haben, sind neue möglichkeiten und bezugspunkte für die herausbildung einer revolutionären bewegung entstanden.

diese entwicklung wollen sie zurückdrehen und umkehren. die aktuellen projekte der konterrevolution: zerschlagung der gefangenkollektive in spanien, die niederschlagung von gefangen-revolten in mehreren ländern, die brutale räumung seit jahren besetzter häuser und knaststrafen in groningen (niederlande), dänemark, die razzien und hetze gegen die hafenstraße stehen da in einer reihe. sie zielen gegen alle ansätze, die, wie zum beispiel der hafen hier dafür stehen, zeigen, daß es möglich ist, gegen ihren machtparat eigene ziele durchzusetzen, daß gegen den kapitalistischen 24-stunden-alltag eine von menschen bestimmte wirklichkeit existieren kann.

gegenüber der internationalen entwicklung, aber gerade auch gegenüber dem faschistischen durchmarsch und dem aufschwingen der brd zur neuen großdeutschen weltmacht, sagen viele genossen und andere menschen, die gegen dieses system der unterdrückung und unmenschlichkeit aufgestanden sind, daß wir keine chance haben durchzukommen, weil der feind übermächtig sei und die kräfte für die umwälzung schwach.

und das ist die andere seite: diese resignation und zum teil auch lähmung verhindert viele initiativen; die schritte im neuaufbau einer starken revolutionären bewegung sein könnten.

die entscheidung gegen das imperialistische system und für eine freie welt, in der die menschen selbstbestimmt und frei leben können, zu kämpfen, kann nicht davon abhängig sein, ob der sieg in greifbarer nähe liegt oder in einem langen kampf durchgeführt werden muß. die entscheidung für den revolutionären kampf kann nur aus der eigenen erfahrung im system und seiner brutalität und zerstörung kommen und aus den eigenen ziele und

vorstellungen - eben wie man leben will.

wir denken, daß ein wichtiger schlüssel für viele, aber auch für die nächsten schritte im aufbau von revolutionärer gegenmacht darin liegt, sich diese erfahrung, denn die ist bei jedem menschen die wurzel für den eigenen aufbruch, bewußt zu machen. die erfahrung der zerstörung durch das system kann zu bewußten und endgültigen entscheidung für die umwälzung der herrschenden realität und für ein selbstbestimmtes leben gebracht werden.

wir alle müssen es jetzt anpacken, zur gemeinsamen kraft zu werden. die entscheidung, die aktion gegen neusel jetzt und im zusammenhang mit dem streik in spanien zu machen, ist für uns ein neuer schritt auf dem weg, zusammen gegenmacht aufzubauen im gemeinsamen kampf für die durchsetzung einer forderung, die brennpunkt in der gesamten auseinandersetzung ist. wir hatten nicht von anfang an vor, in die entwicklung des hungerstreiks der spanischen genossinnen und genossen zu intervenieren. erst nachdem klar war, daß selbst nach dem mord an jose manuel sevilla und den sich daran verschärfenden widersprüchen in spanien selbst und den vielen und vielfältigen initiativen in anderen westeuropäischen ländern für die durchsetzung der forderungen die gonzales-regierung an ihrer harten haltung festhalten will - und eben der einschätzung, daß der westeuropäische block an der zerschlagung der gefangenkollektive in spanien und der liquidierung der genossinnen und genossen dort, die ganze entwicklung und bedingungen für alle kämpfe zurückdrehen und umkehren will - haben wir uns zur bewaffneten intervention entschlossen. nur eine bewaffnete aktion konnte diese festgefressene situation wieder offen machen. sie kann alle initiativen, die zum streik bis jetzt gelaufen sind, zu neuer scharfe bringen, und sie macht vor allem einen neuen anlauf möglich, weil sie den politischen raum dafür aufmacht. jede initiative, die jetzt kommt, zählt!

es ist heute so, und wird aus den unterschiedlichen bedingungen in den einzelnen ländern und der verschiedenen

RAF....

schwerpunkte, die die kämpfenden in diesen ländern für sich bestimmen, weiter so sein, daß sich die antilperialistische front in westeuropa aus einer vielfalt von kämpfen zusammensetzt.

wir denken, daß es jetzt möglich ist und ein erster gemeinsamer schritt im neuaufbau einer starken revolutionären bewegung sein kann, daß wir uns über die brennpunkte in der konfrontation imperialismus/befreiung verständigen, um daran zur gemeinsamen intervention zu kommen. so soll unser angriff jetzt in zwei richtungen wirken, die eine, konkret zur durchsetzung der forderungen der gefangenen und im aufbau revolutionärer gegenmacht in westeuropa, und die andere, als einleitung einer langen kampffase gegen die neuentstandene großdeutsche/westeuropäische weltmacht.

die brd und neuen mächteliten

der ddr verfolgen mit dem schritt zum großdeutschland dieselben ziele und imperialen pläne wie der nazi-faschismus. der dritte überfall, den das deutsche kapital in diesem jahrhundert auf die völker europas führt, wird nicht mit militärischen mitteln, sondern mit den mitteln der wirtschaft und der politik geführt. die unterwerfung von millionen menschen unter die prinzipien von markt, profit und warenstruktur bringt neues leid und elend für die völker. es werden diesmal nicht millionen tote und ausgelöschte dörfer sein, sondern millionen entwürdigte und unterdrückte menschen, die an der zerstörung ihrer lebensstrukturen und menschlichen beziehungen verzweifeln und innerlich - in ihrer seele - zugrunde gehen sollen. und auf der basis der neuen macht, die das brd-kapital an der spitze westeuropas aus dieser entwicklung zieht, wollen sie zu einer neuen runde in der unterwerfung und ausplünderung der völker im trikont ausholen.

wir stellen uns mit aller kraft gegen diese entwicklung, weil es unsere aufgabe im internationalen klassenkrieg ist, sie mit diesen plänen nicht durchkommen zu lassen.

gegen den sprung der westeuropäischen bestie unseren sprung im aufbau revolutionärer gegenmacht!

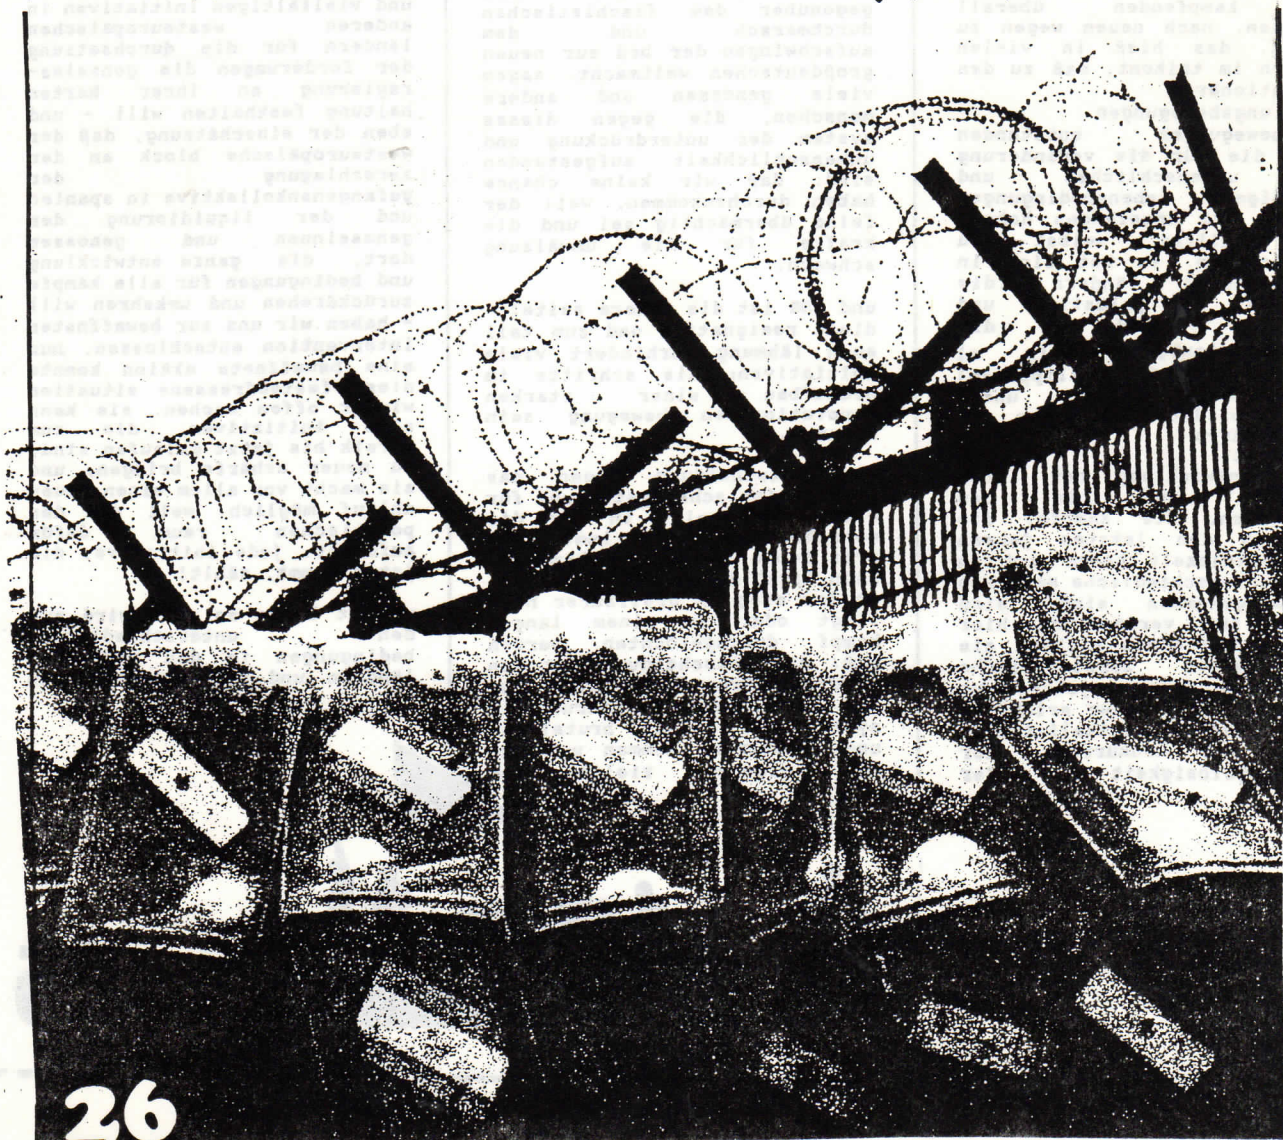

die wiederzusammenlegung der gefangenen von GRAPO und PCE(r) gemeinsam durchsetzen - die zusammenlegung aller revolutionären gefangenen und damit die perspektive für ihre freiheit erkämpfen!

krieg der weltmacht brd/westeuropa!

den bewaffneten kampf organisieren!

zusammen kämpfen und wir werden zusammen siegen!
